

# Tips For Success

## How to access Augmented Reality (AR).

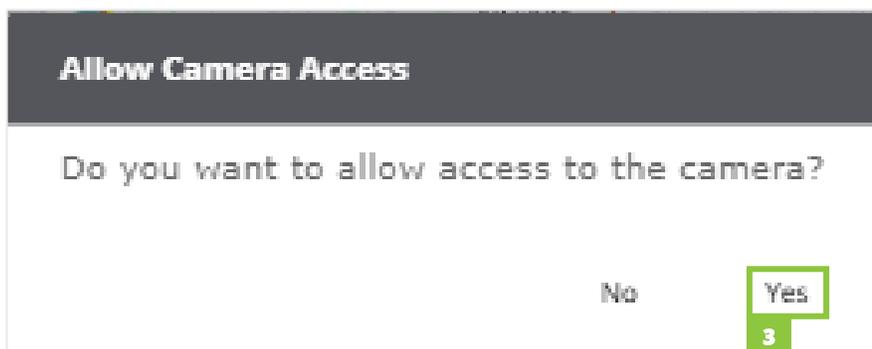

You can access the Augmented Reality (AR) feature in GeoWarehouse mobile or tablet. This feature allows you to explore properties using your device's camera, providing a more immersive and interactive experience.

To access this feature, follow the steps below.

1. Access GeoWarehouse on your mobile device or tablet.
2. Tap on the **camera icon** located at the top of the screen, next to the search bar.

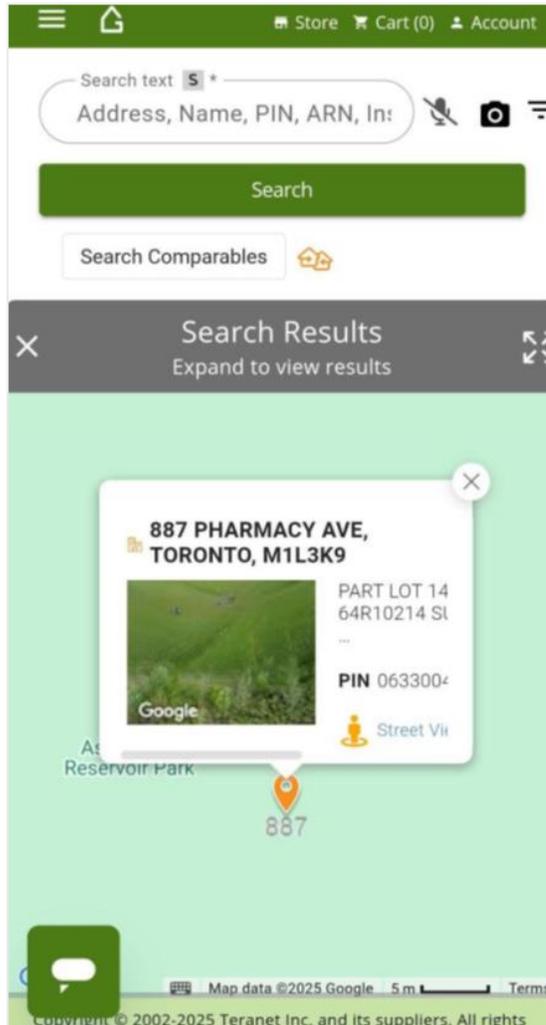

3. A prompt will appear asking for permission to use your camera. To proceed, select **Yes**.

4. A message will appear instructing you to Stand inside or directly in front of the property **and hold your camera still**. This helps locate the property accurately.
5. You will be prompted to **Share your location** with the app. To continue, select **Allow** when asked.
6. The map will automatically adjust to reflect your current location.
7. Once the location is updated, you will be able to access and view the **Property Report**.
